

PRESENTATION of DELIVERABLES (10 mins)

#1 BACKGROUND & TASK 5 mins BROWSER

- internship @ web dev. company websonar
- CIO Roman has gone on holiday & left us w/ a task to do
- client company Riding Cities wants 2 updates to their webpage (html
- woman called Sanya who has given us the req'd updates only)

wants [a) Add in section for the founders of the ~~new~~ company

b) Add in buttons to the child's / adults' sessions

→ given existing webpage, only had to Δ the html

#2 STEPS TO COMPLETE TASKS

5 MINS

BROWSER

Courses
x2

IDE env.

1st webpages

went thr task
brief on assignment
section of webpage
problem solving
thought process

SET UP FRONT END
DEV. ENV.

1st WEBPAGES HTML, CSS

↑
DON'T FLAUNDER
FOR TOO LONG!
10 MINS!!

(2)

DEBRIEFING (15 MINS)

#1 STEPS 900 FEWD COMPLICATED

5 MINS VS CODE

not too short

- ① → knowing which process to use with all info. given
 - e.g. notes / course material, format of notes should take
- ② → which sections of css did what → hoverstate pseudoclass
 - because I was given the css (wasn't written by me), task was just to update the html of the page
- ③ → linking the css to the html w/ classes → hn. which class did what
 - i.e. server ext. on vs code

③

#2 STEPS YOU ENJOYED + FOUND EASIER TO
COMPLETE ← (5 MINS), VS CODE/IDE

- installing the IDE
- the challenge → the big fail on repeat
- e.g. the pdf problem
 - pdf too big
 - tried one drive hyperlinks too slow
 - prog of it
 - also realised compressed pdf
 - but enjoyed the challenge of the "pdf problem"

- #3 QUESTIONS YOU MAY STILL HAVE (5 MINS) BACK INTO
THEIR STREET
THIS
- x2% How likely is it that one would encounter
sort of scenario (e.g. the task brief) in industry and what
would differ in real life?
- For the document which the button links to, would you
recommend a compressed, ~~pdf or a png or a?~~
- #4 ADVICE FROM ASSESSOR / MENTOR (3 MINS)
pdf or a png, for example?
